

2 Fold Sofa Sleeper Mechanism Everyday Use

LINKREST is one of the professional manufacturers and suppliers of 2 fold sofa sleeper mechanism everyday use in China. The 2 fold sofa sleeper mechanism everyday use adopts the anti tilting system and the riveting method to avoid falling problems caused by safety reasons. Its cross lines cover more space and reduce the droop when sleeping. The shoulder pole tilts from the shoulder to reduce discomfort and achieve healthy sleep.

Product Description

Bi Fold Sofa Sleeper Mechanisms

LINKREST is one of the outstanding **2 Fold Sofa Sleeper Mechanism Everyday Use** manufacturers and suppliers in China. We realized that sofa sleeper played more and more important roles in the furniture industry, but we will think very hard for continuing improvements such as: how to make seat as comfortable as stationary seat and how to make sleeper as comfortable as bedroom bed; How to save delivery cost both for mechanism and finished sleeper; How to operate simply for end users both manual and power versions; and how to meet all kind of stationary sofa designs ect. Our wide selection of high-quality and technically innovative folding and unfolding sofa bed mechanisms add value to leading upholstery brands both in domestic and international markets.

2 Fold Sofa Sleeper Mechanism Everyday Use Features & Benefits:

1. Flat to flat riveted which is less noise and long cycles of test.
2. Reduce the height differences between head tube and foot tube for healthy sleeping.
3. Reduce the discomfort to the body because shoulder bar is away from shoulder.
4. Cross wires cover much more space for less sagging during the sleeping.
5. Anti-tilt system is riveted to avoid drop off issue for safety reason.
6. Angle rails system can lock the mattress inside firmly for seat comfort.
7. Offer air breath deck and high leg version.

That's why we strongly recommend you to convert overnight sleeper 2500# to DF00# series.

2 Fold Sofa Sleeper Mechanism Everyday Use Details:

More comfort both sitting and sleeping for operation everyday

RHF is the Old version with 500 cycles of test. LFH is the new version with more than 2000 cycles of test.

 Single Size – 33"

Timber Frame Internal Size

33",40",44",48",55",60",67",68"

Sleeper Assembly Instruction
 Tilt frame forward and move sleeper from bottom into the position, making sure sleeper remains tied down.
 Add the bolts in J-slots location and then carefully remove both ties down.
 Add more wood screws on sleeper mounting plate.

U-shaped support bar
 You're supposed to add U-shaped bar in the end of frame if your customers like to sit at end of sleeper. But in fact not allow people sitting at end of sleeper while in open position.
